A dynamic photograph of a silver Porsche 911 GT3 RS racing car in motion on a track. The car is angled towards the viewer, showing its front-left side. It features a prominent rear wing, black racing stripes, and various sponsor logos including 'PORSCHE', 'Mobil 1', 'MICHELIN', and 'TAG HEUER'. The background shows a blurred landscape and trees under a warm sunset sky.

Herausforderung Defossilisierung der Mobilität

PORSCHE

WORKING TOWARDS THE VALUE CHAIN IN 2030

Net carbon-neutral value chain
in 2030 and a net carbon-
neutral use-phase for future
BEV* models

* BEV = Battery Electric Vehicle, Use Phase based on a mileage of 200.000km / WLTP

PORSCHE

ELECTRIFICATION GOALS

Goal in 2025

> 50 %*
electrified
(BEV+PHEV)**

Goal in 2030

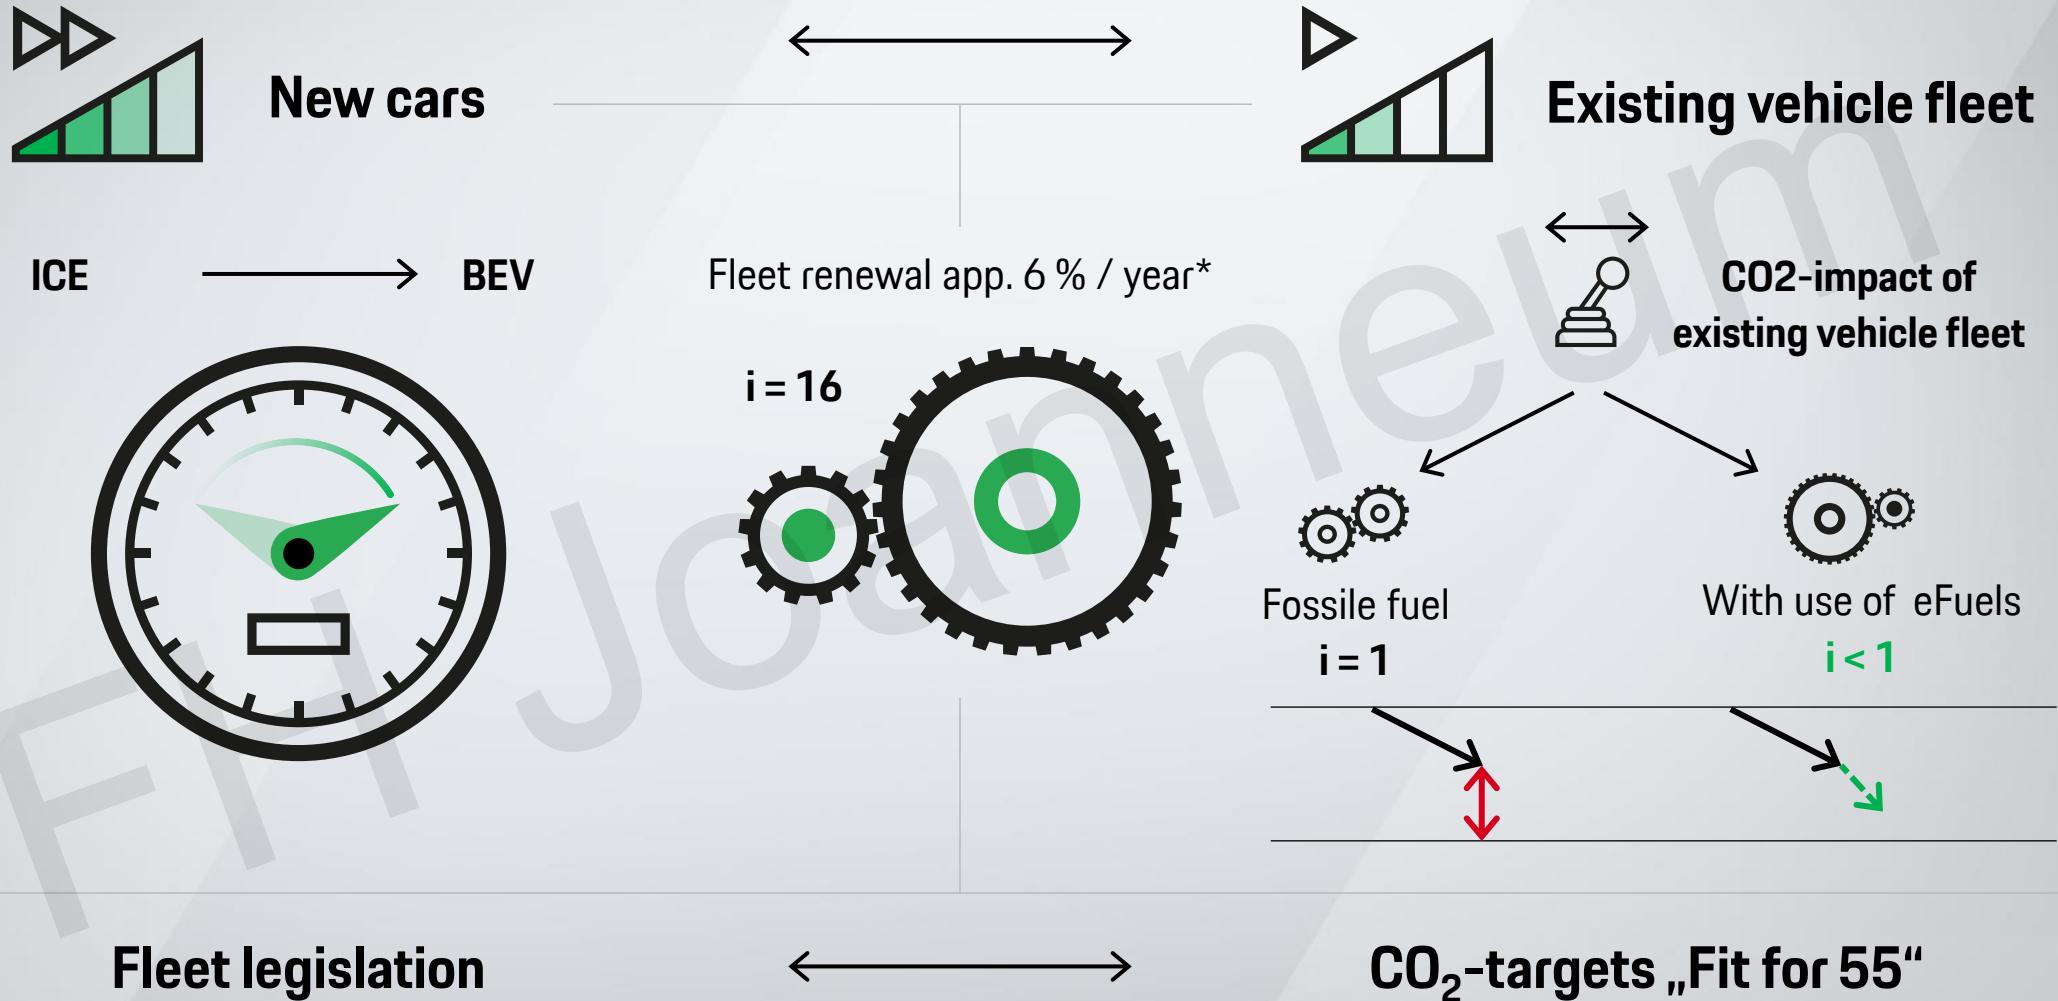

> 80 %*
fully electric
(BEV)**

* Share of deliveries p.a., in %

** BEV = Battery Electric Vehicle, PHEV = Plugin Hybrid Electric Vehicle

8760h per Year

Industrialization of eFuels is a global task, the choice of location is decisive

GERMANY

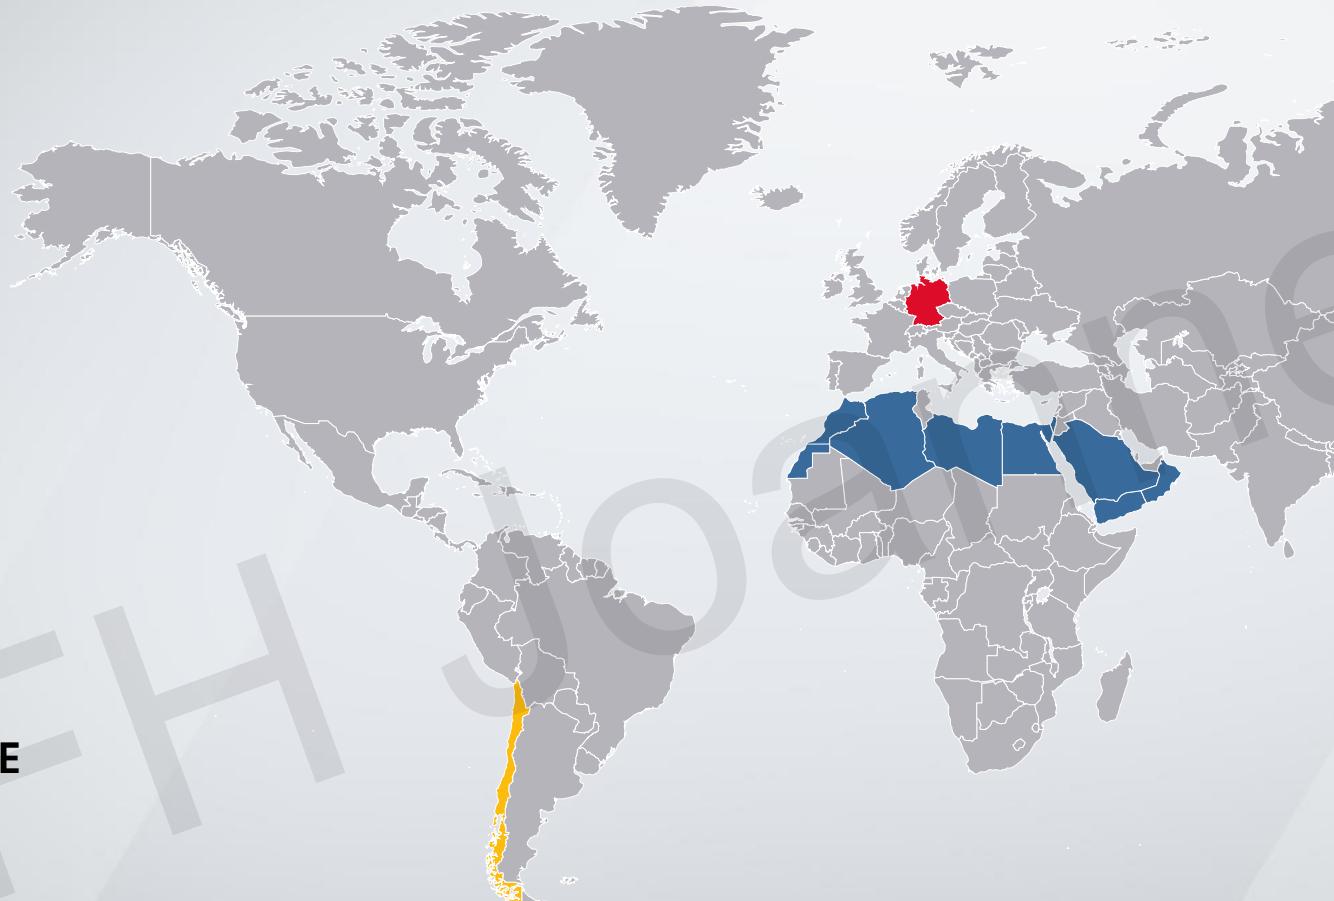

~ 5 ct€/kWh
233 People/km²

MENA

~ 2,5 ct€/kWh
30 People/km²

PATAGONIA/CHILE

~1,5 ct€/kWh
2 People/km²

Success factors for eFuels:

1. Availability of:
 - Cheap renewable energy
 - CO₂
 - Water
2. Acceptance
3. Competitive situation
4. Additionality

2011 2014 2017 2020 2022 2025

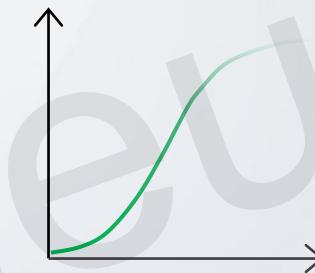

Fuel-Quality

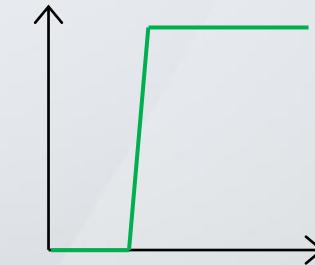

EU5 RF E5 EU6 RF E10
EN228 E10

Supportive
Norm constriction
EN228

Impact

The market penetration of vehicles with new emissions technology is linked to fleet renewal

Changes in fuel quality have an immediate effect throughout the vehicle fleet

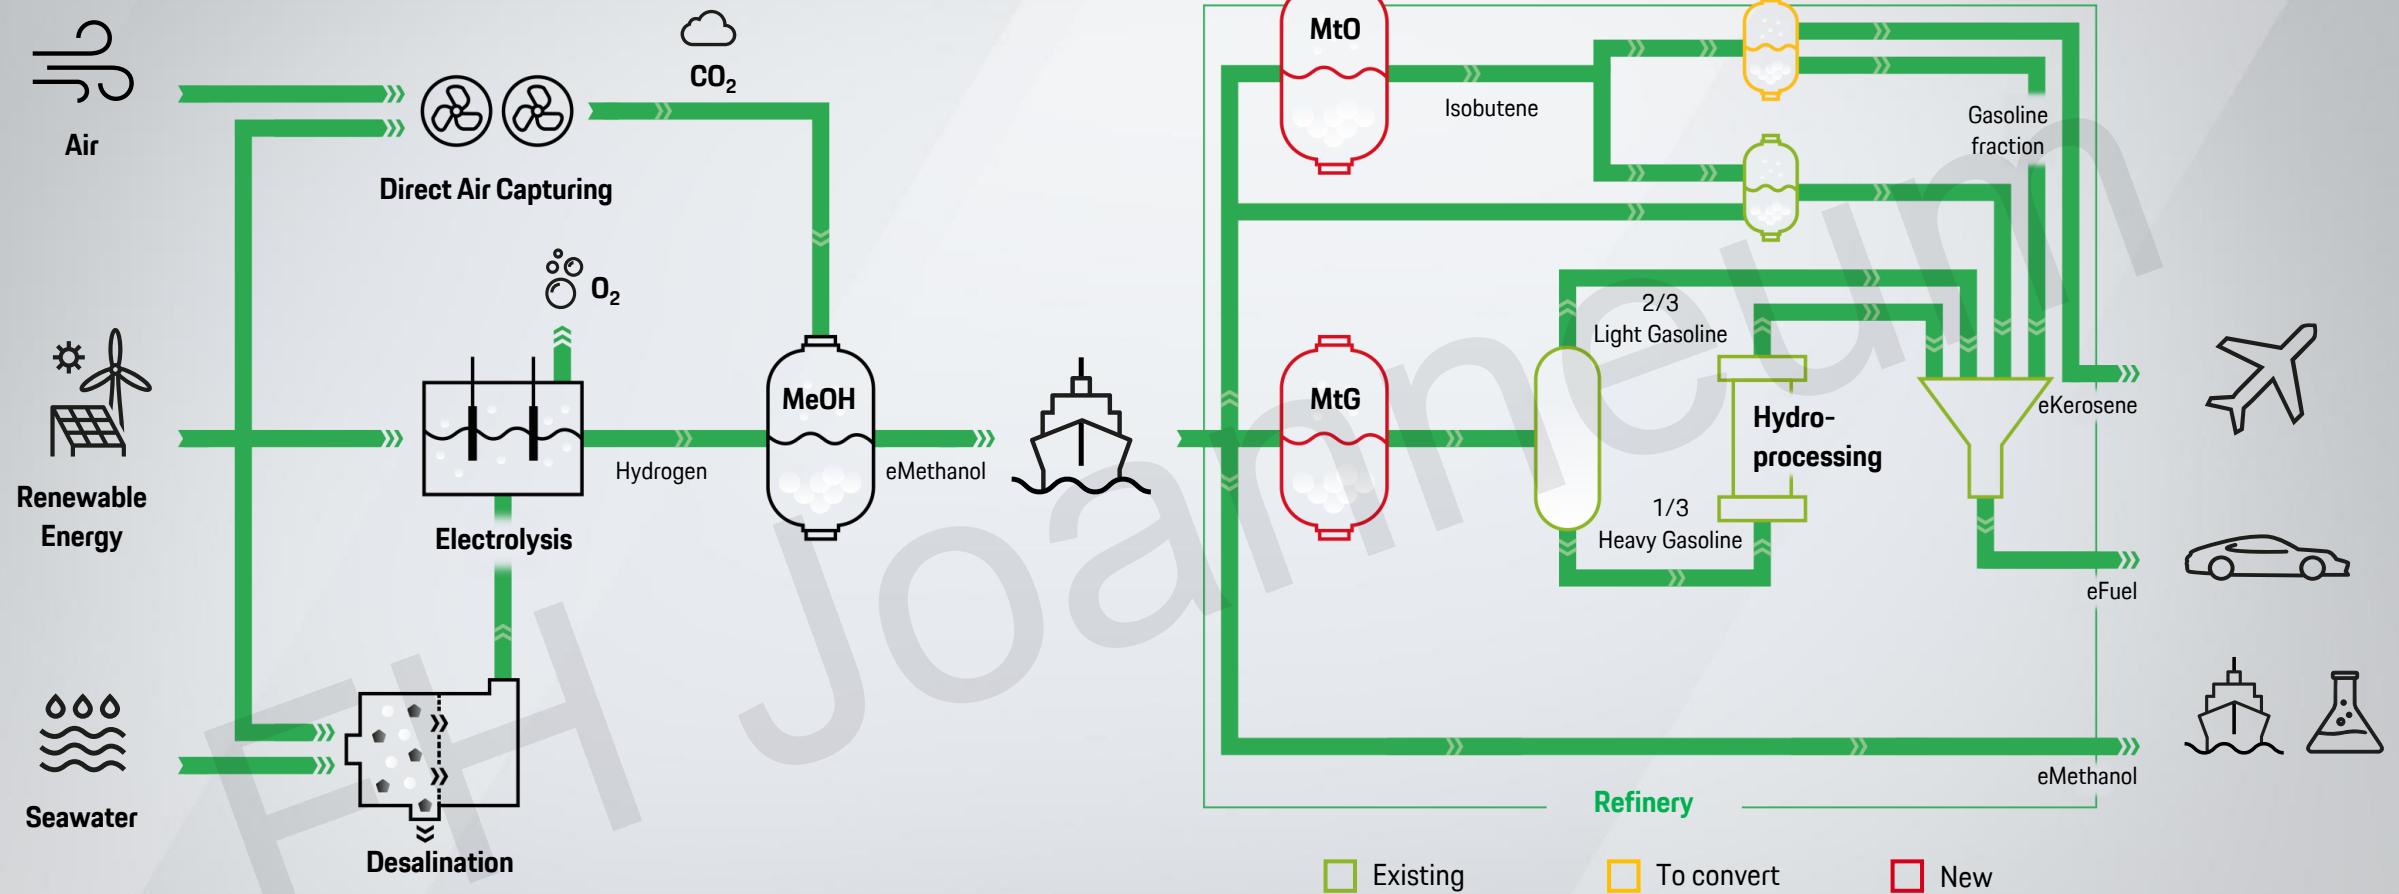

In addition to further improvements in emissions technology, a narrowing of EN228 tolerances could improve air quality

eFuels – mehr als Kraftstoff für Sportwagen

PORSCHE

Global production chain

» Local refineries can be transformed to provide products on a totally renewable basis

eMethanol: a potentially CO₂-neutral crude oil substitute

Energy & Fuel

- Existing car fleet, Offroad, Agriculture, Shipping, Aviation
- Energy carrier for **Power industry**
- **Heavy industry, Chemical industry**
- **Flexible energy reserve**

Worldwide

- **Defossilisation** in structurally weak regions
- **Economically sensible workshare** for CO₂ reduction

Thank you!

PORSCHE
